

Luxury listing marketing burns hours — and dollars — every week.

Brokerages and agents still rebuild brochures in Word/Canva: hunt photos, paste MLS facts, fight templates. At typical agent time (~\$75–\$150/hr loaded), a 2–4 hour flyer is built before design vendor fees. Across a team’s monthly listings, “free tools” become the expensive path.

2–4 hrs per brochure today (Word / Canva rebuild)	~\$150–\$600 labor cost / listing (at \$75–\$150/hr)	<\$10 min URL → edit → PDF with this product	10x+ time compression per listing cycle
--	---	--	--

BEFORE — “Free” tools that aren’t free

- Blank Canva/Word → rebuild brand every listing
- Photo hunting + fact copy-paste + QA loops
- Inconsistent materials across agents and offices
- Hidden cost: staff hours + slower listing launch

AFTER — URL → branded template → edit → \$\$ saved

- 1 Paste a listing URL (ingest photos + facts)
- 2 Auto-fill brokerage-branded template
- 3 Staff edit only the gaps — not rebuild
- 4 Print/PDF in minutes → more listings/week

Sellable to brokerages, proptech teams, and agent networks — productize marketing labor

Listing URL in. Luxury brochure out — in minutes.

Listing Brochure Studio turns a portal listing link into a magazine-style brochure: imported photos and facts, branded layout, neighborhood map, teams edit only what's missing. Built to sell into real-estate companies (marketing/tech) and realtor workflows.

What brokerages and agents get

- Minutes instead of multi-hour Canva rebuilds — labor savings scale across every listing
- Consistent brand presentation: cover, gallery, map, agent/team CTA
- Editable controls: reorder photos, set cover, fill missing facts before PDF
- Deployable demo today (Hugging Face Space) for pilots with real-estate tech & marketing teams

Who buys this — and how we expand the product.

Target buyers

- Real-estate company tech & marketing teams (brokerage ops)
- Proptech platforms adding listing-marketing modules
- Independent realtors and small teams who need speed + consistency
- White-label path: brokerage brand kits on the same engine

Unit economics (illustrative)

- 2–4 hrs → minutes per brochure
- ~\$150–\$600 labor unlocked per listing
- Example: 8 listings/mo × 3 hrs × \$100/hr ≈ \$2,400/mo per
- Seats / offices multiply across a brokerage

Expansion architecture — what to build next

Observe	Tracing (e.g. LangSmith): which photos/facts imported, what stayed blank — debug scrape gaps for ops teams.
Analyze	API payload vs brochure output. Completeness score before PDF so marketing QA is automated.
Generate	LLM luxury copy polish grounded in listing facts — editable overrides for brand control.
Distribute	MLS/IDX sync · batch brochures · seller share links · brokerage white-label brand kits.

CLOSE

Stop paying hours for every flyer.

Input the URL. Edit the template. Keep the margin.

A brochure engine for brokerages, proptech, and realtors — compress listing marketing labor, ship seller-ready PDFs faster, expand listing ops.

Let's generate the next listing before the open house.

Ask: design partners · pilot teams inside real-estate companies · advisors who've scaled agent tooling.
