

From Canva chaos → Compass URL → luxury brochure.

Silicon Valley sellers expect magazine-quality marketing. Today most agents still rebuild every listing by hand in Word or Canva: hunt photos, paste facts, fix typos, export PDF, hope the brand holds. That takes hours — and every listing looks different.

BEFORE — Free tools (Word / Canva)

Untitled listing flyer.canva

- Drag photo... crop... wait, wrong house?
- Copy beds/baths from portal → paste → fix typos
- Pick a template that almost matches Compass brand
- Rewrite headline for the 4th time
- Export PDF → discover missing sqft → reopen Canva
- Repeat tomorrow for the next listing...

AFTER — Automated brochure studio

Hugging Face Space · live now

- 1 Paste Compass listing URL (+ RapidAPI key)
- 2 Auto-fill branded template: photos + facts
- 3 Edit brochure — swap photos, fill gaps
- 4 Print / PDF — seller-ready Letter brochure

Jason Lim · Compass REALTOR® · DRE #02444964 · jasonlimrealty.com

The pitch: stop designing from a blank page. Input a URL into a branded template, then edit — not rebuild.

Screen-share the product. URL in → brochure out.

<https://jasonnlim-listing-brochure-studio-jason-realty.static.hf.space>

- Prefer a live Compass URL + RapidAPI key; if quota is tight, Load Willow Glen demo — still shows the full experience
- Scroll: Hero cover → stats → gallery → neighborhood Google Map → features → Jason Lim agent CTA
- Edit brochure: upload/reorder photos, set cover, fill missing facts — then Print/PDF (enable Background graphics)
- Honest constraint: this version uses Compass.com RapidAPI only (Zillow/Redfin need their own APIs)

Talk track: “Not a chatbot wrap. A listing workflow — scrape → branded template → human edit → PDF.”

Beachhead: brochure. Roadmap: listing operating system.

Why it wins now

- Distribution: every listing appointment is a live demo
- Wedge: brochure → seller packs → AI estimate narrative
- Trust: licensed Compass agent (DRE #02444964) building for peers
- Shipped: public Hugging Face Space — not vapor
- Brand system already matches jasonlimrealty.com

What to build next (architecture)

Observe	LangSmith traces on each run: which API fields returned, which photos landed, which stats s gaps — not a live demo today.
Analyze	Compare “API payload vs brochure output.” Flag missing baths/sqft/photos. Score brochure Print/PDF.
Generate	LLM luxury copy polish grounded only in scraped facts (headline, lifestyle quotes) with editab
Distribute	MLS/IDX photo sync · batch brochures · shareable seller link · team brand kits for brokerage

Expansion pipeline (simple)

Ask

Design partners (SV agents/teams) to pilot URL→brochure on real listings · product feedback on the live Space · advisors who’ve scaled agent tooling. jason.lim@compass.com
