

Luxury listing brochures — from a Compass URL, in seconds.

Sellers expect magazine marketing. Agents get stuck in Canva. We ship a live Hugging Face product: paste a Compass branded editorial brochure → Edit → Print/PDF.

Pain

Hours per brochure, inconsistent brand

Product

Compass RapidAPI → luxury brochure Space

Who

Jason Lim · Compass · DRE #02444964

Screen-share the product. This is the pitch.

<https://jasonnlim-listing-brochure-studio-jason-realty.static hf.space>

- Paste a compass.com/homedetails/... URL + RapidAPI key (or Load Willow Glen demo if quota is tight)
- Generate → scrape Compass photos & facts into a magazine brochure (hero, gallery, Google Map, agent CTA)
- Edit brochure → reorder/upload photos, fill missing baths/sqft — then Print/PDF (enable Background graphics)
- Notice: this build uses Compass.com RapidAPI only — Zillow/Redfin need their own APIs

Talk track: “Not a ChatGPT wrapper — a workflow: scrape → compose → human edit → seller-ready PDF.”

Beachhead: brochure. Company: listing OS.

Why investors should care

- Distribution: every listing appointment is a demo
- Wedge: brochure → seller packs → AI estimate narrative
- Trust: licensed Compass agent building for peers
- Shipped: public HF Space, not slideware

Expansion (next)

- LangSmith traces: debug why photos/facts failed to import, fields, scrape gaps
- Analyze brochure quality run-by-run (what rendered vs what API returned)
- LLM luxury copy polish grounded in listing facts
- MLS/IDX sync, batch brochures, seller share links
